

Print Alliance Credit Exchange

A Word from our Members

I was looking for an alternative to the generic type of information provided by most credit reporting outfits. Going with PACE was a no brainer. PACE gives me easy, on-line access to real-time, industry specific data *plus* the shared credit experience of others in the industry. This adds up to exactly what I need to make good, timely credit decisions.

I've been a PACE member for more than ten years and continue to consider it an indispensable resource for effective credit management.

Mike Fleming
VP – Operations
Golden Business Forms

Golden Business Forms was founded in 1965 and is based in Golden City, Missouri. Products produced include business forms, ATM/POS rolls, Laser Checks and cut sheets.

Golden Business Forms has been a member for more than 27 years. Mike Fleming has been active in PACE for 10+ years.

PACE is an association of print and graphic media manufacturers formed for the express purpose of sharing factual ledger experience on mutual accounts. Organized in 1965 and formerly named FMCI (Forms Manufacturers Credit Interchange), PACE is one of the most effective means available for monitoring your customers' credit worthiness.

Prior to joining PACE, we had to work with limited information. Credit applications, after all, only give references chosen by the customer.

PACE has expanded the breadth of the data available to us. It gives us a look at other payment trends and the prospective creditor's performance with other vendors.

By putting fast, current, industry specific information at our fingertips – at less cost than the standard generic reports – *PACE has been helping us make more informed credit decisions for more than ten years.*
